FLOW 01

Add a research paper.

Keep the first step simple. One file, one language preference, one clear action.

FLOW 02

Read the paper at a glance.

The result page groups the information researchers need most. Each claim links back to the source.

Attention Is All You Need

Vaswani et al. · 2017 · 15 pages

Analysed

Overview | Key points | Methodology | Limitations | Ask paper | Final report

Paper summary

ENGLISH

The paper introduces the Transformer, a sequence model that relies on attention to connect tokens. It removes recurrence and uses self-attention and feed-forward layers to process sequences in parallel.

Objective

Build a sequence transduction model that trains in parallel and improves translation quality.

Finding

The reported Transformer model reached strong translation results with lower training cost.

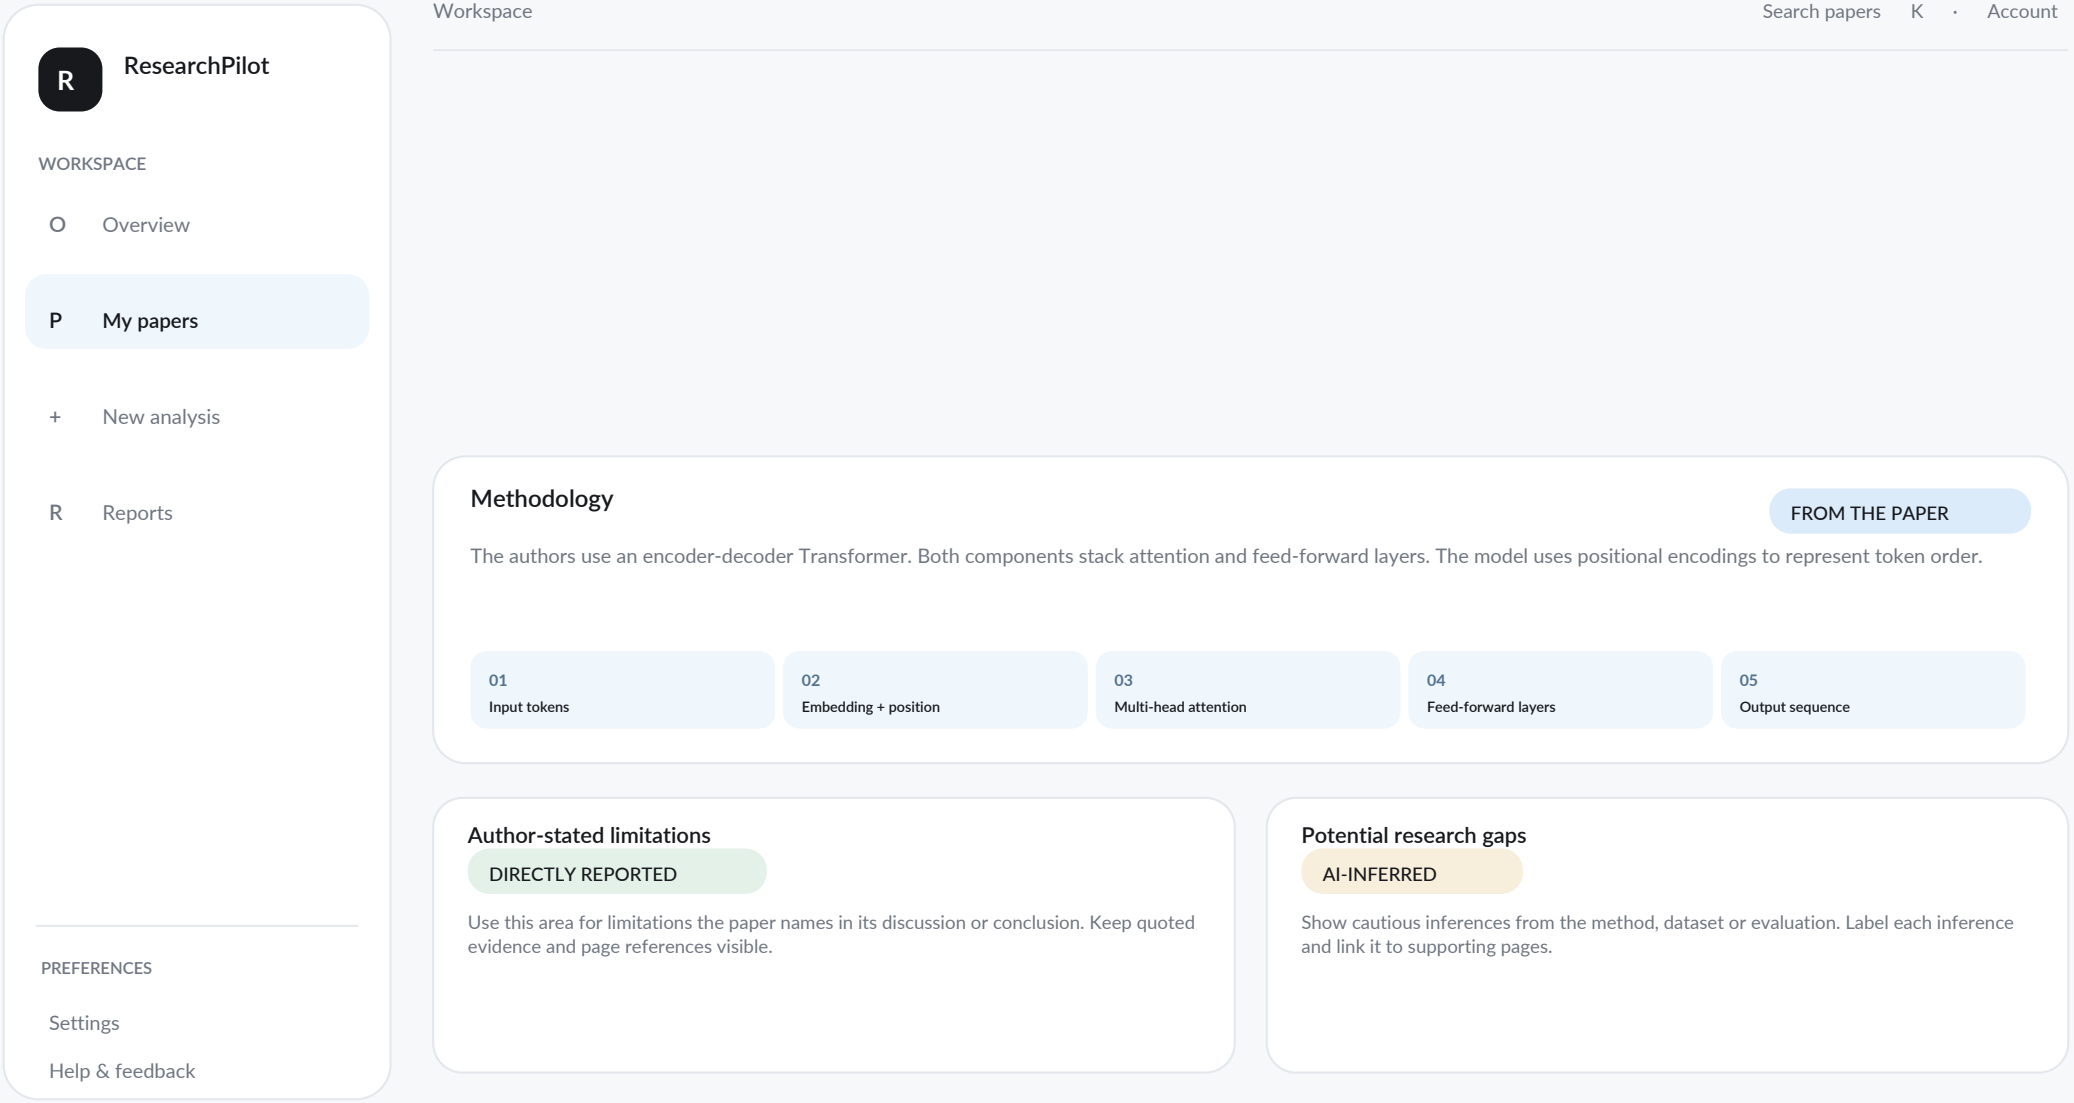

Method at a glance

Architecture	Core mechanism	Evaluation
Encoder-decoder	Self-attention	WMT translation

FLOW 03

Inspect methods and limitations.

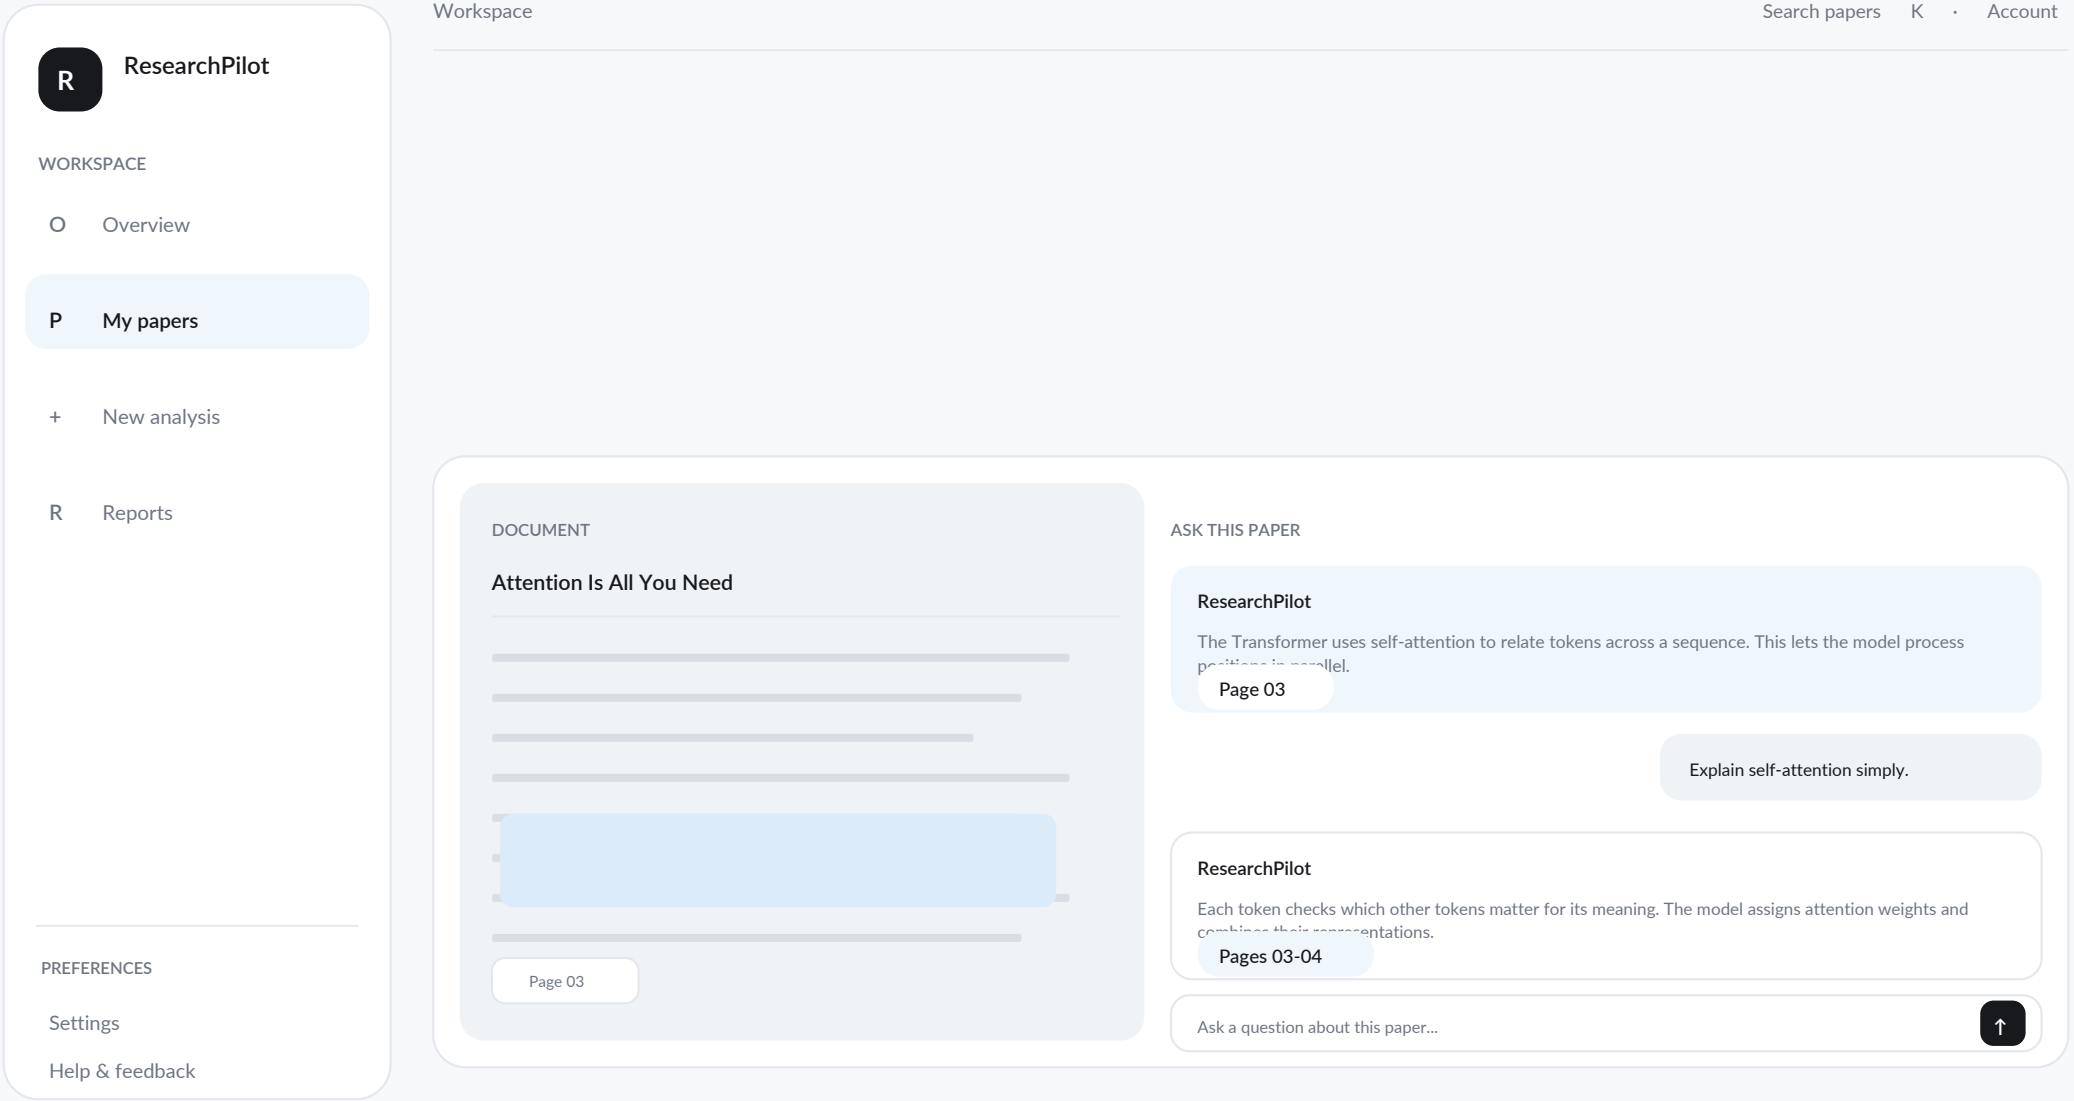

Separate what the authors report from what the analysis infers.

FLOW 04

Ask the paper a question.

A focused chat sits beside the source, with page references attached to answers.

FLOW 05

Create a report you can share.

Choose the language and sections. Preview the document before downloading.
